CEDIA is the global trade organization for firms designing and installing custom residential technology, and is the leading authority on the connected home. The CEDIA Awards represent the pinnacle of excellence in the home technology industry.

**FINALIST**

Integrated Home Americas

The Control4 solution makes this system simple and reliable.

In the family room, a single button sets the scene for movie night, turning the home theater on, dimming the lights and closing the shades.

SIMPLICITY AND RELIABILITY WERE THE KEYS TO THIS INTEGRATION, SINCE THE HOMEOWNER IS SOMETHING OF A "TECHNOPHOBE."

Audio is distributed throughout eight zones of this house.

Integrated Home Americas

PROJECT

## Allergic to Technology

TECHNOLOGY INTEGRATOR

## Smartlab

The owner of this house in Mexico City claimed to be "allergic to technology," so simplicity and reliability were the keys to this integration, which relies on a Control4 solution.

For security Smartlab used Control4 door station keypads to unlock doors at the main entrance and garage. A Spyclops CCTV system was integrated into the Control4 security system.

Audio is distributed through eight zones, indoor and outdoor, using Control4's audio distribution systems, which allow the users to listen to different sources in different rooms simultaneously.

Two 5.1 home theaters were installed, those systems include Denon receivers and Revel speakers with Polk Audio subwoofers.

Pakedge was the choice for networking, and four wireless access points were installed to give great coverage. Pakedge's BakPak system helps monitor and troubleshoot the system remotely.

Some of the home's tech is completely automated. For example, when the intercom door station is activated, its video feed appears in the touchscreens and a custom ring sounds in the kitchen. Lighting scenes execute and shades open and close automatically based on schedules and times.

Elsewhere, one-touch controls do the work: In the master bedroom's entrance a button turns off all the lights in the common areas, closes all the blinds and turns on the audio and TV. In the family room, a single button sets the scene for movie night, turning the home theater on, dimming the lights, and closing the shades.
